ASMO 

#WeAreASMO

We are ASMO, a groundbreaking joint venture between DHL and Aramco **set to redefine procurement and supply chain management** across KSA and the MENA region. With a focus on the energy, chemical, and industrial sectors, we are driving advancements in efficiency and productivity.

Committed to **innovation, reliability, and sustainability**, we deliver end-to-end procurement and supply chain solutions that streamline operations, reduce costs, and drive sustainable practices.

Forging Success, One Link at a Time. //

We elevate supply chain management to new heights by using our expertise and cutting-edge solutions to optimize every part of the supply chain process.

We turn our customers' challenges into opportunities, propelling them towards success.

Recognizing the complexity of supply chains, we refine every link from **procurement to inventory management, logistics, warehousing, and a B2B e-marketplace,** ensuring they work together flawlessly.

Our Vision //

To become the **leading procurement and supply chain services provider** for the energy, chemical, and industrial sectors in KSA and the wider MENA region.

Our Mission //

To provide reliable **world-class end to end supply chain services**, creating value for companies in the energy, chemical and industrial sectors in KSA and the wider MENA region.

Saudi Vision 2030 and **Beyond** //

Aligned with Saudi Arabia's Vision 2030, we are establishing a **world-class transportation and logistics hub** that supports economic diversification and industrial growth.

As a leading end-to-end supply chain partner, we empower the local private sector, including SMEs, with **solutions that drive economic development, create job opportunities, and enhance supply chain resilience** through active participation in the IKTVA program.

Our Core Services //

We combine **industry expertise with advanced technology** to **deliver comprehensive, end-to-end supply chain services.**

Our approach ensures that every solution is both efficient and adaptable, meeting the evolving needs of the energy, chemical, and industrial sectors.

Supplier Management

Centralized access to an optimized and disciplined supplier base with sustainable procurement decisions facilitated by intuitive, automated technology.

Supply and Demand Planning

Harmonizing master data elements across the ecosystem, leveraging cutting-edge technologies for integrated demand planning and forecasting.

Sourcing & Procurement

Consolidated sourcing and procurement of materials and services from domestic and international suppliers, with a focus on efficiency and cost-effectiveness.

Inventory Optimization

Innovative solutions for optimizing inventory storage, reducing excess, and streamlining the flow of goods with real-time visibility and control.

Logistics & Transportation Management

We plan, manage, and execute comprehensive end-to-end logistics solutions to ensure the smooth and efficient movement of goods. From inbound transportation to final distribution, our approach guarantees reliability, timeliness, and operational excellence.

Warehouse Management

Our warehousing management services are designed to ensure seamless storage and handling of goods, meeting the unique needs of every business we serve. By combining state-of-the-art facilities, advanced technology, and efficient processes, we provide tailored solutions to optimize warehouse operations.

Control Tower

Comprehensive end-to-end supply chain visibility, integrating predictive analytics and real-time data for enhanced decision-making.

Reclamation Management

Comprehensive services for obsolete inventory, supporting a circular economy and reducing environmental impacts.

E-marketplace

A B2B platform simplifying the purchasing process, enhancing connectivity and collaboration between our customers and suppliers across the supply chain.

Sustainable Growth Through Sustainable Communities //

Our mission extends beyond business, we strive to transform business practices to **provide sustainable employment opportunities and protect the environment.**

Focusing on environmental, social, and governance (ESG) aspects, we develop and retain our employees, uphold **the highest standards of corporate governance**, and integrate principles of the circular economy.
